Subject Additional Flying RAF Leeming

The Station is about to enter a period of significant additional aircraft movement, with several exercises operating from here in the run-up to Christmas.

From the beginning of November, RAF Leeming will host multiple aircraft types for sorties which will include low flying and some periods of 24 hour operation.

We understand our responsibility as good neighbours to inform the local community of movements which are additional to our normal flying activity and every effort will be made to keep the disturbance to a minimum.
